

Bringing it **ALL** **TOGETHER!**

CHALLENGE

Life.Church reinforces their message with high-quality, 3-dimensional displays throughout the buildings they occupy. Many of the displays consist of multiple layers that are printed, shaped, painted, assembled, and packaged ranging in size from 3' to 8' long. The materials list includes metal, wood, PVC, ultra-board, styrene, card stock, and various types of hardware. Manufacturing a signage package for one of their campuses requires a lot of space, expertise, and capacity.

SOLUTION

Having the space, expertise, and capacity to manufacture each signage package in-house made S&S the right partner for Life.Church.

RESULTS

"A match made in heaven." The team at Life.Church no longer has to procure multiple signage components from multiple vendors and then receive, assemble, package, and ship from their offices in north OKC. This frees them up to do what they do best while allowing S&S to handle the rest.
